The object of this course is to provide dentists the knowledge and practical skills to offer patients a range of exciting, technologically advanced treatment options. The techniques to be taught are minimally invasive, metal-free, aesthetically pleasing and patient-friendly. They are, moreover, highly cost-effective which is something of increasing importance in the current climate

Great emphasis will be placed on the hands-on element of the course and through their handling of the fibres delegates will obtain the confidence and skills they need to use fibre technology :

Fee: £50 per dentist, presented at your practice. (All Members of Staff welcome – free of charge)

- **Do the hands-on course.**
- **Select the patient.**
- **Get the work satisfaction!!**

After attending the hands-on course delegates

Should be able to:

- Splint periodontally compromised teeth as part of a comprehensive periodontal treatment plan.
- Place a direct fibre reinforced composite bridge on a well designed fibre frame – an excellent and reliable **alternative to the conventional Mary Land bridges**. (lab option also covered).

Delegates will gain a good knowledge of all the many different applications of Fibre reinforced composites in dentistry.
